Minutes by	Michael Jastram

2 Agenda and Discussion

- I'll follow up with WP2 regarding empty chapters in D2.1
Cecile takes ownership of O7.1.9 (Tool Platform Evaluation). There is a wiki page for this purpose:
<https://github.com/openETCS/toolchain/wiki/Tool-Platforms-Evaluation>
- The current status of inputs for WP7 is documented here:
<https://github.com/openETCS/toolchain/wiki/Project-Management#weekly-activities-02-m>
- Some deliverables are delayed, compared with our DoW and the project plan. Nevertheless, all telco participants agreed that the delays will not impede the WP7 timetable. If anyone feels that our timetable is endangered by the new delivery dates, please let me know asap.
- WP2 Reviews: WP2 initiated a number of reviews, more will be initiated in the coming days. PLEASE actively participate in the review process, as these are the final deliverables.
- Evaluation Timetable: Marielle created a timeline which is documented here:
<https://github.com/openETCS/model-evaluation/wiki/Benchmark--to-evaluate-model-and-t>
Currently, we are on time. I linked this timetable to the WP7 entry page.
- Bibliography and Glossary: Cecile will add these to the repository.
- No Telco on May 10th, due to public holidays.
